

The Pioneer Clean Energy Center Yuma County, Arizona

KNOW THE FACTS

The Pioneer Clean Energy Center is proposed to be located in Yuma County, AZ and is planned to have a **capacity of up to 300 MW of reliable affordable renewable power**. The project will also integrate on-site energy storage.

This project is expected to create approximately **250-300 jobs** during construction.

The Pioneer Clean Energy Center will provide **significant economic uplift** and contribute **over \$42M to the ASLD-K12 education trust**.

Our solar projects are safe and quiet. Panels are secured to posts which are driven into the ground without concrete. **This not only reduces impacts to land but makes for simple land restoration at the end of the project life.**

When a solar project's life is complete, equipment is removed, **the majority of the components are recycled**, and the site is returned to its original condition.

Operating the Pioneer Clean Energy Center will represent **an over 99% reduction in water consumption** compared with current alfalfa production in the same location.

BrightNight is working with landowners, community members, and local leaders **to collaborate on the project's design and local direct benefits.**

The Pioneer Clean Energy Center is expected to generate **\$83.3M in local, state and property tax revenue** without a costly burden on public services and infrastructure (i.e., roads or water access).

Thank you for supporting the BrightNight Pioneer Clean Energy Center. **You can count on us** for regular updates via our newsletters, events, and website.

Who Is BrightNight

- BrightNight is a U.S.-based, renewable power company working to provide clean power projects for a decarbonized energy future.
- BrightNight is home to countless industry leading experts who have long professional histories, ready to bring communities well-built and well-managed projects that go above and beyond industry standards.
- As an independent power producer, BrightNight develops, owns, and operates its projects. Because of our long-term investment, we work to become a part of your community to support your region's growth and development goals over the life of our project.
