

Flag Run Solar Project

Clark County, Indiana

KNOW THE FACTS

The Flag Run Solar Project will add **up to 350MW of energy to the grid**, and will include a **\$200 million dollar plus** capital investment in Clark County.

The Flag Run Solar Project is expected to create **over 200 jobs** during construction.

The Flag Run Solar Project is projected to generate **more than \$1 million** in new property tax revenue per year, without raising taxes on local residents.

Solar projects provide **meaningful economic value** through tax revenue and job creation without a costly burden on public services and infrastructure (i.e., roads or water access).

When the project's life is complete, the site is returned to its original condition, and the majority of components are recycled. BrightNight is committed to meeting Clark County's requirements for all decommissioning protocols at **zero responsibility to the landowner**.

Our solar projects are **safe and quiet**. Panels are secured to posts that are driven into the ground **without concrete**. This not only reduces impacts on the land but also makes for simple land restoration at the end of the project's life.

Who Is BrightNight

- BrightNight is a U.S.-based, renewable power company working to provide clean power projects for a decarbonized energy future.
- Our experts have a long professional history with over 10,000 megawatts of projects installed and operated successfully.
- As an independent power producer, BrightNight develops, owns, and operates its projects. Because of our long-term investment, we work to become a part of your community to support your region's growth and development goals over the life of our project.

In addition to the jobs created during construction, we'll be hiring to fill approximately **5-6 long-term careers** in operations and maintenance.

Per county requirements, the project will be **setback from parcel boundaries** and include **vegetative screening** between the project and its neighbors.

BrightNight leads the industry in its commitment to **sustainable land use practices**. For each project, we look for ways to integrate eco-friendly features such as livestock grazing areas, bee apiaries, and pollinator habitats with the greatest benefit to the land and the lowest impact on its resources.

Thank you for your interest in the **Flag Run Solar Project**. Visit our community page to learn more: **brightnightpower.com/flagrun-community**
