

Providing Training to First Responders in Washington

BrightNight at work in our project communities

How we helped

BrightNight supported the East Pierce County Fire Department by providing specialized response training from Coffman Engineers, a leading organization in fire safety and emergency response planning. This training was part of BrightNight's commitment to being a good local partner to its Greenwater project community. The training ensures that fire response teams are well-prepared to handle the unlikely event of a fire at the battery storage facility, as well as other specialized equipment in the area. After meeting with the fire department and understanding their needs, it was clear that their biggest requirement was regular training from outside experts. BrightNight addressed this need by facilitating expert-led training sessions with Coffman Engineers. This initiative underscores BrightNight's dedication to community safety and proactive engagement.

Project

200MW Battery Energy Storage System, "Greenwater"

Location

Pierce County, WA

Impact

Funded ongoing training for local fire department

Our Greenwater community

BrightNight's efforts in the Greenwater project community exemplify our dedication to being a reliable and valued local partner. We continuously strive to support local initiatives and build robust community relationships. In response to community feedback, we made significant modifications to our project layout to enhance road safety for nearby residents and accommodate walking trails frequently used by our neighbors. These actions highlight BrightNight's commitment to sustainable development and the enrichment of the communities where our projects are located. By listening to and addressing community concerns, we demonstrate our promise to foster positive impacts and strong community ties.
